97-98. G. WIRADJURIC GROUP

a. *Main Wiradjuric** (O'G:Main) Subgroup

The members of this Subgroup (renamed *Main Wiradjuric* by Wurm) are similar to those of the 1966 classification except that *Geawegal*, 97.lb, (or *Gwiyagal*) is now classified as part of *Dharawal* - see 88.2c*, and *Barungama*, 97.7, as part of *Waga-Waga* - see 94.lg*.

A noted characteristic of these languages is an unusual proliferation of tenses and specific time markers pinpointing action to specific time of day or night (as in *Tiwi*, 1). (SAW)
