'man' : atua

- 66.lc Eastern Aranda * Todd and Hale Rivers
area centered in
Alice Springs (KH)

Has 86% cognates with Western Aranda, 83% with Anmadjara and 77% with Southern Aranda.

- 66.ld Anmadjara * Stirling, Tea Tree, C5
Aileron, Coniston,
Napperby area (KH)

Anmadjera (T, O'G, 'RLS', AC, SAW, KH), Anmatyira
(Yallop), Anmadjara (AC, AIAS), Umatjera (Ingamalls)

66.le Western Aranda * From Narwietooma to
Hermannsberg & Upper
Finke River (KH)

Has 84% cognates with Southern Aranda and 82% with
Anmadjara.

66.lf Southern Aranda * Along Finke River (KH)

Pitima (KH), *Pirdima* ('RLS')

Strehlow reports is now virtually extinct. Has 65%
cognates with Lower Aranda.

66.lg Andagerebina ** Tarlton and Tago C3 (AIAS C12)
area, Central
Australia ('RLS')

Means 'after' or 'from the south'.

Andagerebina (AC, GB, AIAS), *Andakerebina* (O'G, SAW,
'RLS'), *Juranja* (alt. name used by tribes to east -
GB), *Nambila-Nambila*, *Nhambilanhambila*, *Nyambilany-*
ambila (Warluwaric form - horde name of speakers from
Georgina River - any differences that existed have
probably all disappeared - GB), *Undekerebina* (R),
Williwilli (C), *Yanindo* (RHM)

Roth published a word list. Breen recorded a fair
amount of material on his fields trips in 1970-2,
including c. 20 songs. Four informants from Dajarra,
one from Boulia and one from Mt. Isa have supplied
the information. Blake also has a medium corpus.
Breen reports there is still more language available
and a depth study possible. About 10 fluent speakers
remain, two of whom are still fruitful informants.
Blake reports that *Aliwampinya* is a sub-dialect - a
special form of *Andagerebina* in which the regular
Andagerebina words take additional affixes.

(The reference in 'RLS' to *Bulanu* should be deleted
since it is now classified with the Warluwaric Group).

'man' : *artwa*
