

94-96.

F. WAKA-KABIC GROUP

(South eastern Queensland)

Holmer's extensive field work in south eastern Queensland (1970-73) has aimed at salvaging all vernacular that remains in this area and linking his study to the similar one in which he was previously engaged in northern New South Wales on which his study of *Gadhang* and *Dhaggadi* was based. This section has been difficult to re-assess because Holmer's preliminary findings appear to question the present classification. He divides the dialects into two groups, western (comprising *Waka-Waka*, *Wuli-Wuli* and *Barranggam*) and eastern (comprising *Goreng-Goreng*, *Goeng-Goeng*, *Badjala* and *Gabi-Gabi*). Wurm's 1970 classification has been used as the basis of the present classification as, where there is no new evidence, the old classification has been accepted. But the above changes as suggested by Holmer have been agreed upon, and also the deletion of *Geinjan* and *Jagara* (also deleted by SAW), and *wadja* and *Gangulu* (now generally agreed belong to Mari languages).

Waka-Waka phonemes (20) distinguish five linear stop-nasal phonemes (retroflexed and alveopalatal, along with the basic three), and *l, *r, *w, *R, and *y, and there are five vowels plus length ('AL').

94.

a. *Miyan* Subgroup

Wurm says this subgroup is characterized by extreme freedom of word order typical of many Australian languages. Non-phonemic gemination of stops and nasals is also a prominent feature.

[94.1a Geinjan See 'RLS' D14 (AIAS D36)

Geinjan (AC, AIAS), *Keinjan* (O'G, 'RLS')

Deleted from classification by Wurm.]

94.1a* Dungidjau EI9 (AIAS E20)

Dungidjau (AC, AIAS, SAW, O'G, 'RLS'), *Dungidau*
(Winterbottam)

Holmer has collected a little fresh data from two informants ('72).

- [94.1c Yagara See 93.3* above.]
- 94.1d Ngoera E55 (AIAS E22)
Ngoera (AC, AIAS, SAW, O'G, 'RLS'), *Kiabara* (Howitt)
Presumed extinct.
'man' : *dthun* (C:167)
- 94.1e Waga-Waga Burnett Downs area (NH) E59 (AIAS E28)
(also see 'RLS')
- Waga-Waga* (AIAS, PS), *Wakawaka* (O'G, 'RLS'), *Wagawaga* (AC, orig, AIAS), *Wakka Wakka* (NH), *Woka-Woka* (Hall), *Biloela* (dialect name)
- Holmer has gathered a reasonable amount of data in the Cherbourg - Brisbane area and hopes to be able to give a fairly full description of the language.
- 'man' : *mean* (C:159); *dthan, maree* (C:165)
- 94.1f* Wuli-Wuli * Dawson area (NH); Hawkwood Station, south of Mundubeera (Hall)
- Wuli-Wuli* (Hall, NH), *Wulili* (incorrectly spelt & listed in 'RLS' under *Waga-Waga*, 94.1e.)
- Hall (1970) and Holmer (1972) have gathered some remnants. The latter states it is preferable to consider *Wuli-Wuli* as an independent language, parallel to *Waga-Waga* within this group of languages.
- 'man' : *murrun* (Hall)
- 94.1g* Barunggama D7 (AIAS D40)
(97.7)
- Barunggama* (AC, SAW, AIAS), *Barunggam* (O'G, 'RLS'), *Barrunggam* (NH), *Parrungoom* (Barlow)
