

cycle (swan) and fragments of another (fish) have been collected. Breen has also collected a small corpus. A word list in a "Mulligan River dialect" by W. Fraser in "Science of Man" appears to be *Yarluyandi*.

'man' : *matarda* (GB)

- 74.1f* Midhaga * The Bluff to Haddon L32 (AIAS L34)
(3Lr.) Downs, Currawilla,
Monkira & Cacoory (GB)

Midhaga (AC, AIAS), *Mitaka* (T, GB), *Murunuda* (Mathew), *Marrula* (name preferred by one of GB's informants) or alternatively, *Marrunada* (note spelling corrections to those given in 'RLS')

Breen has been collecting data and believes he has all that is now available (several hours recording comprising 200-300 words and basic grammatical material). It shares 74% common vocabulary with *Garuwali*.

'man' : *karna* (GB)

- 74.1g* Garuwali Around Windorah, next L13 (AIAS L35)
(74.4f) language to *Midhaga* (GB)

Karuwali (GB, SAW, O'G, 'RLS'), "*Karawalla*", "*Tunberri*" (both C), *Currungulla* (W.H.W), *Garuwali* (AC, AIAS)

No recent information except that Breen puts its cognate count with *Yawarawarka* as 36%.

- 74.2a* Yawarawarga Cooper Creek, Haddon L23 (AIAS L23)
(74.3) Downs, Goyder Lagoon,
Arrabury ('RLS')

Jawaraworga (AC, AIAS, SAW), *Jauraworka* (AC, SAW), *Yawarawarka* (GB), *Yawarawarga* (AIAS), *Yowerawoolka* (C), *Yaurorka* (Howitt), *Ngananhina* (probably a dialect or horde name - GB)

In 1970 and 1971 Breen made further recordings at Birdsville. A little more may be possibly salvaged from a remaining informant. Corpus now tallies several hours and 200-300 words. It shares a common vocabulary with *Yandruwanda* of 75%.
