

- 61.2 Banggala (Pangkala) Port Lincoln to L2a (AIAS L6)
head of Spencer
Gulf (AC)

Bangala (Sch), *Banggala* (AIAS), *Ba:nggala* (AC, APE),
Ba:njgala (LH), *Kortabina* (C), *Pangkala* (T, O'G, 'RLS'),
Pankala (Worms), *Pankarla* (O'G), *Pankalla* (Schur,
Taplin)

Schurmann's vocabulary shows an asymmetrical phonology - no alveolar stop and no word beginning with a - he has words beginning with *i* and *u* but he probably failed to hear word initial *y* and *w*. It has an estimated shared basic vocabulary with *Mirninj*, 55.1a* of 22% and with *Arabana*, 73a, of 15% (O'G-K). Hercus has salvaged what remains of this dialect, which might supplement O'Grady's as yet unpublished material.

Distinguishing features:

'this' : *inna*
'many' : *ngalla*
'go' : *nguka*
'I' (trans): *ngatto*; (also *ngai*)
'man' : *yura* (O'G-K)

- 61.3 Guyani West side of Flinders L15 (AIAS L9)
Range, north end of
Lake Torrens

Gujani (AC, LH, orig. AIAS), *Guyani* (AIAS), *Kooyiannie* (C), *Kuyani* (SAW, O'G, 'RLS', Howitt), *Kujani* (Sch., Reuther)

Hercus' salvage has been extended by the discovery of a 90 year old *Arabana* speaker of *Guyani* ancestry who remembered her *Guyani* with great fluency (1972). This should supplement what Schebeck gathered (1966?) and with fragments of *Nugunu* and *Banggala* be enough for comparison with *Adnjamadana*.

'man' : *dura* (LH)

- 61.4 Adnjamadana- Western slopes of L43 (AIAS L10,17.1)
northern Flinders
Ranges (LH)
Wailbi Blinman and Parachilna (AC)
