

Only information remains that of Wurm's assigning it to be a dialect of *Maljangaba*. Presumed extinct.

76c Maljangaba Milparinka, N.S.W., D27, L27 (AIAS L8)
eastern shores of
Lake Frome ('RLS')

Maljangaba (AC, AIAS), *Maljangapa* (O'G, 'RLS').
Malyangapa (SAW)

The language is now extinct but Hercus was able to collect some linguistic data from a speaker. This will supplement Wurm's material and provide texts for syntactic study. It may yet be classified in the Yura Subgroup because of certain similarities to *Yardliyawara*, 61.5a (see comment there).
