Nungali

Bolt, Hoddinott, Kofod have written a typescript 'Elementary Grammar of the Nungali Language of the Northern Territory' with basic grammatical information and a 550 word vocabulary (pp. 184, 1971). Phonologically *Nungali* is similar to *Ngaliwuru*. Though it is a multiple classifying language (four classes) with full concord, the bulk of the vocabulary is similar or identical with *Djamingjung*, and verb prefixes and object incorporation in the verb are very alike.

'man' : *dungunin*
