Around Esperance from

*Wudjari* deviates a little from the more western Ngungar dialects in phonology and vocabulary and to a lesser degree in grammar where *Njagi-Njagi Ngadjunma* influence could be possible. Grey (1840) commented on the dialects being fairly mutually intelligible but that the King George Sound language dropped the final V and ended syllables with a C. Douglas recorded some in 1964. Included by von Brandenstein as part of *Wudjari*.
